

Spiritual Artistry

Michell Jonas'

As an Intuitive Photographic Artist I want my images to inspire you, invoke you, and capture the very essence of who you are. These unique personalized images are created intuitively and often include artistic and energetic touches that express the individuality of those she works with. assisting them to meditate, manifest, and tap into their source

Photography

A portrait is more than a picture or a snapshot. Portraits are vignettes of your past, a glimpse of days gone by and people remembered. A great portrait will make time stand still, freeze that moment for you to treasure for the rest of your life. A photographer can take a picture, but it takes a true photographic artist to capture the raw emotion that looks into your soul.

As a native Arizonan, my love of photography started at a very early age. My dad, a train conductor for the Santa Fe railroad, traveled in some of the most remote locations of this state. I would sit in awe as he told me of all the places he had seen, the people that traveled on the train, and see the pictures, already framed in my head.
